

Are you considering solar to get your bills down, but uncertain whether solar is right for you? Are you wary of potential rogue installers in such a new industry? Would you know a good solar panel brand from a dud? What about batteries?

At long last there is an independent guide to buying and installing solar in Australia with the express aim of getting your future energy bills as low as possible.

The Good Solar Guide demystifies the solar buying process in Australia showing you how many panels you need, which panel brands to buy, which to avoid, and how to find a great installer.

Finn Peacock is a Chartered Electrical Engineer and the founder of SolarQuotes, a website that has helped almost 300,000 Australian homeowners get quotes for solar. Before founding SolarQuotes he worked for CSIRO commercializing their solar and energy efficiency technology. Finn lives in Adelaide in a solar home made of straw. His last quarterly power bill was \$11.27 which powered a family of 5, a small business and an 8kW Finnish sauna. Learn more at www.finnpeacock.com
